

Kardex AutoStore™ Xperience Tour

AGRO | Hunzenschwil, Switzerland 19 January 2027

Experience AutoStore™ in live operation and discover how AGRO and Kardex have created an automated storage and picking solution that intelligently connects logistics across two levels.

Swiss engineering with more than 70 years of experience

Founded in 1953, **AGRO** develops and manufactures high-quality solutions for cable entry and cable installation at its headquarters in Hunzenschwil, Switzerland. The company specializes in cable glands and electrical installation solutions for demanding applications in areas such as mechanical engineering, plant and equipment construction, infrastructure and professional building installations.

Today, AGRO's cable gland portfolio comprises more than **3,500 products**, with its solutions distributed internationally through a network covering around **40 countries**. AGRO has been part of the **KAISER GROUP** since 2002 and employs more than 100 people. At its Hunzenschwil site, AGRO combines this long-standing Swiss engineering expertise with modern automated logistics.

Two levels. One intelligent storage system.
At its headquarters, AGRO operates an AutoStore™ solution implemented together with Kardex for the storage and picking of **semi-finished and finished goods.** What makes the installation particularly interesting is its **two-level design**.

The AutoStore grid combines approximately **2,500 bins on the ground floor with around 10,500 bins on the upper floor**. Vertical lifts and conveyor technology connect the two grids, enabling goods to move efficiently between the different levels.

R5 Red Line robots operate within the system, while AutoStore ConveyorPorts provide workstations for picking and replenishment. The solution is designed for **24/7 operation**, bringing automated storage, picking and material transport together within one integrated setup.

The system has been in operation since **August 2025**.

The solution at a glance

- Approx. **13,000 AutoStore™ bins** across two levels
- **R5 Red Line robots**
- AutoStore™ ConveyorPorts for picking and replenishment
- Up to **180 bin presentations per hour per ConveyorPort**
- Vertical lifts connecting the two AutoStore grids
- Integrated conveyor technology
- Storage of semi-finished and finished goods
- Designed for **24/7 operation**

What to expect

- Experience the AGRO AutoStore™ solution in live operation
- Discover the concept behind the two-level installation
- Hear first-hand about the project and collaboration with Kardex
- Take a guided tour of the automated logistics environment
- See how AutoStore™, vertical lifts and conveyor technology work together
- Exchange directly with AGRO and Kardex experts

Participation

Participation is free of charge. As places are limited, attendance is subject to confirmation.
